

## Takeoff and Grow Day (Tag Day)

### May 30, 2009, 10:00 AM to 4:00 PM

# Have you ever wanted to fly a radio controlled model airplane? Now is your chance!

Pontiac Miniature Aircraft Club (PMAC) is holding a special event for the local community. Community members who would like to experience the thrill of flying a radio controlled model airplane are invited to come to PMAC field (see map below) to have this unforgettable experience. First, you will be introduced to the flight control system on a computer simulator. Then you'll fly a real PMAC trainer plane with a PMAC flight instructor. This service is free, but subject to limited availability.

PMAC has one of the best no nonsense radio control model flight training programs in the country. Training is officially done every Thursday, beginning at 6:00 pm until dark from May into October.

We dedicate a great deal of time and effort to our new students. With an emphasis on safety all pilots will receive comprehensive ground schooling and correct pit procedure instruction.

For those who have yet to buy, complete your model, or even commit in some way to the hobby of RC flying, yet have the need to know what its all about, then take advantage of one of PMAC's several club trainers for a demonstration flight. See you on Thursday nights or at the upcoming TAG Day on May 30.

## PMAC

PMAC Flying Field is on White Lake Rd, West of Andersonville Rd and East of Teggerdine in White Lake Township.
